Beethoven's

10th

When Beethoven died in March 1827 a part of his legacy were **40 sketches** for a 10th unfinished symphony.

A team of experts in machine learning and musicology used those sketches to create an AI to finish what the master never could.

The 10th symphony will premier with the **Beethoven Orchestra Bonn** in front of a live audience

THE FILM FOCUSES ON **THREE** NARRATIVES

INTERVIEWEES
